

KWS LILI

Winter Wheat

KWS Horizon x CPBT W134

SEEDING
THE FUTURE
SINCE 1856

Because markets can change.

- Group 2 breadmaking quality
- Superb export potential - rated positive for **ukp**
- High yields with good grain quality
- Short and stiff
- Consistent across regions and soil types

KWS Lili is the one of the highest yielding breadmaking wheats on the Recommended List for 2017/18. It has robust agronomic characteristics including one of the best combinations of standing ability and disease resistance packages on the RL.

The millers want it; it ticks their boxes for hagberg and specific weight and, while being on the lower end of their specifications for protein (11.9), it has produced good loaf volumes at these levels. It is perfect for growing for low grade milling wheat exports based on the 11.5% protein contracts for **ukp** cargoes.

KWS Lili is a relatively high tillering variety suiting most situations. It has good resistance to most diseases including an all important, solid 5.9 rating for *Septoria tritici* plus an 8 for mildew and 7 for yellow rust.

Rated 8 for lodging with PGRs KWS Lili is relatively short and stiff and stands well in the field. Two days behind JB Diego, it is a mid-maturity wheat.

	KWS Lili	JB Diego
Yield (%)		
UK	102	100
East	102	100
West	102	101
North	104	100
Disease		
Mildew	8	6
Yellow Rust	7	5
Brown Rust	5	6
<i>S.Nodorum</i>	[6]	6
<i>S.tritici</i>	5.9	5.2
Eyespot	5	5
Fusarium	6	6
