

Tundra

High yielding, pale hilum winter bean

Agronomic Traits: Good Standing

Tundra is an exciting new winter bean variety for growers, from the Limagrain breeding programme. It is a very high yielding, pale skinned winter bean with a pale hilum colour – potentially suitable for the premium export market for human consumption.

Tundra's yield potential is a significant 8% above Wizard, the current market-leading variety.

Strengths

- Very high yield
- 8% higher yielding than the market leader
- Pale skin, pale hilum
- Good standing
- Moderately short strawed
- Relatively early to mature

Technical Information

Tundra has good agronomic attributes, being a moderately short strawed variety with good standing ability.

Tundra is relatively early to mature. Tundra has a pale hilum colour, similar to Wizard, making it potentially suited to the premium export markets for human consumption. Tundra, as all current RL winter beans, is colour flowered and a has high tannin type.

	TUNDRA	Wizard	Honey
Yield as % Control	104	96	96
