

LG Flynn

One of the best specific weights

Market Options: Feed

BaYMV Resistance: Yes

Sitting at 104% on the AHDB Recommended List, LG Flynn offers a step up in yield for 2-row winter barleys. LG Flynn offers one of the best specific weights with screenings similar to KWS Cassia. Its high yield potential, solid agronomic characteristics and very good grain quality help ensure reliable performance on farm.

Strengths

- Very high yield potential
- Good straw attributes
- One of the highest specific weights available
- Excellent grain quality
- Strong disease ratings
