

SY Insitor

AB111-1011 x Hereford

Maturity +1

Grain quality

Specific weight:
78.2 kg

Hagberg Falling
Number: 270

Protein content:
10.8%

Recommended seed rate:

September:
275-325 seeds/m²

October:
325-375 seeds/m²

November:
375+ seeds/m²

Exceptional yields throughout the UK

UK	E	W	N
104	104	104	105

Robust disease & agronomics

Height (cm): 95

Lodging no PGR
(1-9): 6

Lodging with PGR
(1-9): 7

Nitrogen advice:

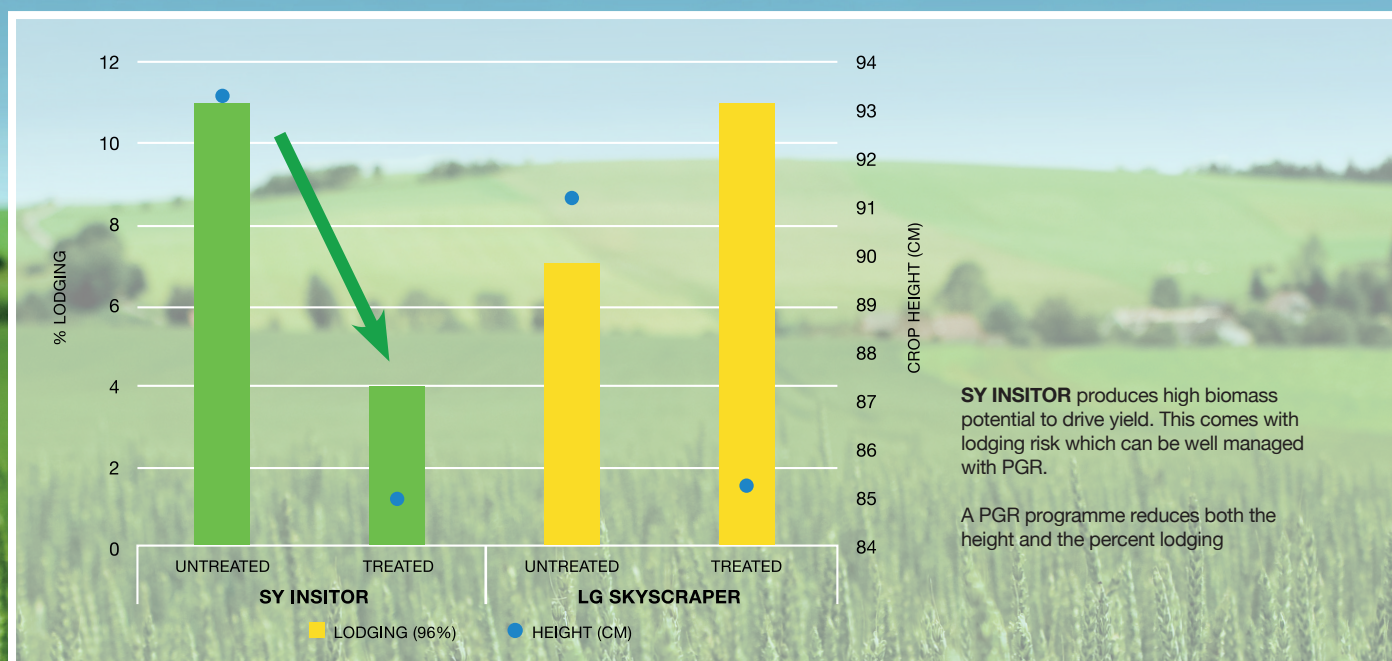

A standard nitrogen input programme for a feed variety should be applied, typically 180 kg N/ha

SY INSITOR

AT A GLANCE

- A very high yielding hard group 4 feed wheat
- Outstanding yields across the whole of the UK
- Excellent performance on all soil types and all mid to late drilling positions
- Excellent *Septoria tritici* resistance
- OWBM resistant
- Very high specific weight

SY INSITOR IS A TALLER VARIETY THAT SHOWS A VERY STRONG RESPONSE TO PGR

You're going to need a bigger barn

SY Insitor. A winter wheat combining a very high yield with strong disease resistance and excellent grain quality.

 **SY Insitor**
Winter wheat
