Recommended List 2019.

Variety Data: RGT Windozz (E/W)

VARIETY OVERVIEW:

RGT Windozz is the highest gross output hybrid oilseed rape on the Recommended List for the East/West region. This has underpinned its position as the variety of choice on many farms since gaining full recommendation on the 2016/17 list. This hybrid is also of the earliest varieties to get away in the spring and one of the earliest to mature. This, plus solid disease resistance to both light leaf spot and stem canker as well as short, stiff straw, offers reliability up to and through harvest.
