UK YIELD

YIELD PERFORMANCE

AGRONOMIC RATINGS

	Lodging -PGR (1-9)	Height (cm)	Ripening (days +/- Planet)	Resistance to brackling (1-9)
RGT Planet	7	73	0	8
Laureate	6	70	+1	8
KWS Sassy	6	78	+1	6

DISEASE RATINGS

	Mildew	Brown rust	Rhynchosporium
RGT Planet	8	5	6
Laureate	9	5	7
KWS Sassy	9	5	6

RGT Planet is the most widely accepted brewing variety in the world and more markets are continually opening up. It is grown in many countries, reflecting its consistency and durability.

RGT Planet is agronomically strong and produces excellent quality grain, traits that helped it become a leading spring barley in the UK. Global but local - the variety travels well but also performs on your farm.

AGRONOMICS

Lodging -PGR (1-9)	7
Height (cm)	73
Ripening (days +/- Planet)	0
Resistance to brackling (1-9)	8

DISEASE

Mildew (1-9)	8
Brown rust (1-9)	5
Rhynchosporium (1-9)	6

MALTING QUALITY

Hot water extract (l deg/kg)	313.2
------------------------------	-------

RGT Planet quality traits remains in high demand by end users.
